

PATENT

NOVEL PURINE DERIVATIVES, METHOD FOR PREPARING THEM,
5 THEIR APPLICATION AS MEDICINAL PRODUCTS, PHARMACEUTICAL
COMPOSITIONS AND NOVEL USE

AVENTIS PHARMA S.A.

ABSTRACT

The invention relates to novel products of formula (I):

in which :

Y represents N, O, S, CHR₃ or =CR₃

the dashed line representing a single or double bond,

20 R and R₁ represent in particular H, Hal, OH, alkyl, alkoxy, cyano, NO₂, NR₄R₅, trifluoromethyl, trifluoromethoxy, aryl, heteroaryl, -S(O)_n-NR₄R₅ with n representing 0 to 2, acyl, -NH-CO-alkyl or -NH-CO-NH-phenyl,

25 R₃ represents H, Hal, alkyl, cyano, NO₂, NR₄R₅, trifluoromethyl or aryl,

R₂ represents R₄, OR₄, SR₄ or NR₄R₅,

R₄ represents H, alkyl, cycloalkyl or aryl,

either R₄ and R₅ are chosen from the values for R₄, or R₄ and R₅ form, with N, a heterocyclic radical which may
30 contain N, O and S,

all these radicals being optionally substituted, these products being in all the isomeric forms and the salts, as medicinal products.
